### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 11 July 2003.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Viland'327.

The Viland reference discloses a vapor recovery dispensing system comprising a vapor return line 35 associated with dispensers 15,16, a vent pipe 39, a pressure relief valve 38 (i.e. some kind of sensor structure would be inherent to the valves operation) and a refrigeration unit 50.

In regard to claim 9, the method as claimed would be inherent during normal use and operation of the device.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Viland in view of Hartsell, Jr. et al.

Art Unit: 3751

The Viland reference discloses a vapor recovery dispensing system (supra) including a vapor control valve 34, but does not disclose a control unit (i.e. no mention of any control at all) or associated flow meter. The Hartsell, Jr. et al. reference discloses another vapor recovery dispensing system with microprocessor control 30 with vapor flow meter 26 and vapor control valve 25 associated therewith to accurately meter recovered vapor flowing back to the tank 2 and ultimately control the operation of the entire dispensing system. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Viland device to have a control with an associated flow meter in view of the teachings of the Hartsell, Jr. et al. reference to accurately meter recovered vapor flowing back to the tank 2 and ultimately control the operation of the entire dispensing system.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Nitecki et al. and Pettazzoni et al. references pertain to other vapor recovery refueling systems with associated vapor condensing systems.
